

CW WIRE CUTTERS

ROTARY CUTTER (RC) | LINEAR CUTTER (LC) | CROSS CUTTER (XC)

The industrial-grade CW WIRE CUTTERS help paper recyclers and processors to automate their operations, boosting production rates while guaranteeing steady high-quality material flow. The CW WIRE CUTTERS also improve workplace safety, and help to lower labour and machine operating costs.

SAFE

EFFICIENT

STEADY

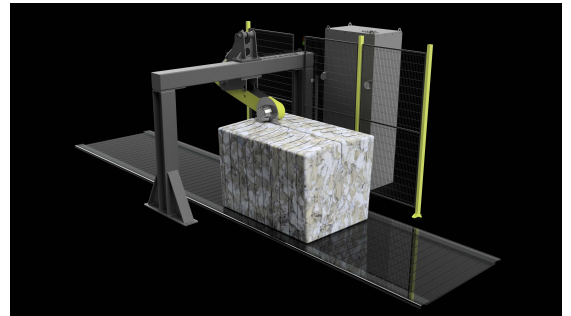

ADAPTABLE

FLEXIBLE

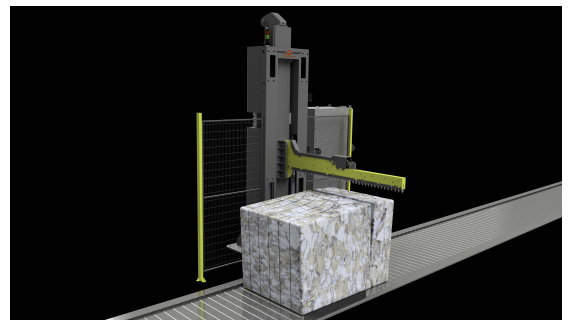

CW ROTARY CUTTER (RC)

- CW ROTARY CUTTER is a bale wire cutting unit to open transversal top wires / straps.
- The cutter floats on top of bale and cuts the wires at the speed of the conveyor offering big capacity.

CW LINEAR CUTTER (LC)

- CW LINEAR CUTTER is a bale wire cutting unit for longitudinal top wires / straps.
- LC cutter automatically stops and starts the conveyor while bale arrives to the cutting area.
- Each bale cutting cycle lasts less than 20 seconds.
- Stays clean from wires.

CW CROSS CUTTER (XC)

- The CW CROSS CUTTER has both LC & RC wire cutting units for cutting longitudinal and transversal bale top wires / straps.
